Re: IB Docket No. 11-109

Dear Ms. Dortch:

I hope all is well in Washington and that you were able to enjoy your holiday. I am writing in support of the company LightSquared and their multibillion dollar investment in a new, state of the art wireless broadband network.

LightSquared is committed to bringing broadband to all Americans, specifically 260 million Americans by 2015. They are focused on developing individual and cost effective solutions for our wireless infrastructure. This new broadband network was created in an effort to open up more wireless space that is currently being used by devices such as smart phones and tablets. The end users will be truly benefit from the benefits of innovation and increasing competition.

The wholesale business model that LightSquared operates on will lead to dramatically lower prices at retail level and give consumers a new option for wireless broadband. Consumers will get to experience innovative products with no monthly contracts. The aspect that I find most exciting is that the new network will create 15,000 new jobs and \$14 billion in new investment for US wireless infrastructure. The new jobs that will result from this network have the chance to impact many American families for the better.

Unfortunately, in September 2010 some GPS receivers began to experience some interference because they can be overpowered by signals transmitted by LightSquared inside the spectrum the FCC licensed LightSquared. Even though LightSquared was not responsible for creating the interference problem, they are working with companies to solve it quickly and completely.

I support LightSquared in their venture to revolutionize the wireless industry and I hope you and the FCC will do so as well. Thank you for your time and support in the matter.

Best wishes for a happy and healthy new year.

Sincerely,

Daryl Z. LeHew  
Londonderry Township Supervisor
